

MID-TERM PROJECT DOCUMENTATION

I created a website that can store subjects scores for each student in the class. Teacher has to input the score for each subject from each student. Then, the website will generate three types of charts to demonstrate the whole class's study performances. Teacher can know his students weakness and strength through charts.

FORM – INPUT CATEGORIES

Semester, Student Name, Math, English, Science, History, PE, Computer

JOURNAL ENTRIES

3/10

Brainstorming, Surfing the Internet to see what should I build.

3/11

Finalized my ideas, decided to build a website for teacher to keep scores

3/13

Built forms

3/14

Learned Chart.js, learned to build a radar chart

3/15

Put forms and charts together

3/16

Built a homepage for the website

3/21

Presented in class and got some feedbacks

2/25

Made two more charts, added Student Name to the form, linked submit button to the chart page, added spring/fall semester to the form

2/28

Redesigned the style of the website
